Forward

International comparisons and benchmarking of European packaging recovery systems is a complex issue – very often such efforts result in “comparing apples with oranges” or worse. There are several factors affecting fee levels which should be taken into account when comparing the relative costs of compliance across various European schemes. Major factors influencing relative compliance costs include the following:

- Existing national collection and recovery infrastructure in the waste management sector – both for packaging waste as well as other waste streams – e.g. residual and organic waste.
- The source of packaging used to meet national recycling quotas (household only or all packaging, including industrial and transport packaging). Household packaging waste is more expensive to collect and recover than packaging waste arising at production or retail outlets.
- The proportionate share of costs which industry bears: Some schemes meet 100% cost of collection and recovery cost, while others only pay a share thereof, and the rest is paid by the municipalities/fees from consumers.
- National recycling targets and the effect of derogations for some member states.
- Collection system used - bring systems are generally less expensive than kerbside collection from households, but deliver less material for recycling.
- Geographic location and population density - Remote and sparsely populated regions will generally be more difficult and expensive to collect from.
- Enforcement influences costs: The more companies participate in the scheme and the lower the rate of freeriders, the greater the spread of the cost base, and the lower the cost for the individual company.
- Labour costs and general overheads differ depending on the prevailing local economic conditions.
- National waste legislation and enforcement: some countries have a comprehensive landfill ban in effect, while others still are striving to manage largely unstructured waste disposal.

The present document provides an overview about the costs of participation in the respective national recovery systems for packaging and packaging waste for 2024 (where available). All figures have been sent to us by the respective systems and have been compiled to the best of our knowledge. Nevertheless, this information is subject to change without prior notice to us and we therefore cannot guarantee its accuracy and applicability to each packaging. We therefore kindly ask you to get in touch with the respective system(s) of your country(ies) of operation to obtain the latest information relevant to you. Should you have any further questions, please feel free to contact me.

Best regards

Ursula Denison

Croatia – Eko-Ozra

The Environmental Protection and Energy Efficiency Fund (EPEEF)

Fee for all the packaging

Waste disposal fee by the type of materials and weight

Material		EUR/ t
PET		54.42
AL cans		54.42
FE cans		29.86
Paper, cardboard		49.77
Multilayered (composite) packaging with predominantly paper – cardboard component	for drinks	54.42
	other	99.54
Wood		19.91
Textile		19.91
Plastic bags		199.08
Other polymeric materials		99.54
Other polymeric materials (milk and dairy products)		54.42
Glass		19.91

Other fees for beverage packaging - volumes 0,2-3,0 L (PET, AL, Fe, glass)

- *Waste disposal fee per packaging* 0,01327 EUR
- *Waste disposal fee per packaging(milk and dairy products)* 0,000265 EUR
- *Refundable fee* 0,07 EUR per packaging

Beverage shall mean a drinkable product, i.e. alcoholic beverage, non-alcoholic drink, table, natural mineral water and spring water, fruit syrups, fruit juices and nectars, milk and liquid dairy products and other liquid products on the basis of fruit or other basis, and any other additive that packaged together with a liquid base makes a complete primary packaging unit.

Fee for the usage of the Green Dot trademark (charged by Eko-Ozra) stays the same (mechanism of its calculation as well)

- small companies* pay fixed fee of 929,12 EUR per year
- medium companies* pay fixed fee of 1592,78 EUR per year
- large companies pay* fixed fee of 3185,56 EUR per year

**Size of the company-user is determined based on Croatian Chamber of Economy Registrar.*

Germany - Der Grüne Punkt - Duales System Deutschland GmbH Fees 2024

DSD offers separate contracts for participation in the compliance scheme and use of the trademark “Der Grüne Punkt” in Germany.

- A. The compliance fees (fee for participation in the dual system of Der Grüne Punkt) are based on weight and material type of the packaging. Interested companies can receive an offer via the customer portal «VerpackGO»: [Your license calculator \(gruener-punkt.de\)](https://gruener-punkt.de)

The materials are separated into 8 categories:

- | | |
|---------------------|--|
| 1. Glass | 5. Plastics |
| 2. Paper, Cardboard | 6. Composite carton (beverage carton etc.) |
| 3. Tinplate | 7. Miscellaneous composites |
| 4. Aluminium | 8. Organic materials |

For determining the fee, first the packaging has to be separated in all its parts, sorted by categories. The weight, multiplied by the price for each material and by the number of packaging put on market is the fee for the participation in our packaging recovery system.

- B. The fees for the **isolated trademark use “Der Grüne Punkt”** (“The Green Dot”) for packaging circulated in Germany are:

MATERIAL	EURO/TON
Glass	1.00
Paper/board/cardboard	3.00
Ferrous metals	5.00
Aluminium	13.00
Plastics	17.00
Beverage carton packaging	13.00
Other Composites packaging	13.00
Other Materials	2.00

Please note that the trademark usage contract **only covers the cost for use of the trademark “Der Grüne Punkt” on packaging put on market in Germany**. When you sign it, you receive the approval to mark your sales packages with our globally protected trademark. However, with the trademark usage contract alone, you will **not be meeting your obligations under the German Packaging Ordinance**. For

this purpose, you will have to conclude an appropriate **participation agreement with a dual system**/compliance scheme. The trademark usage and participation contracts offered by Der Grüne Punkt can each be concluded separately from each other. More information can be found on our website:

<https://www.gruener-punkt.de/en/packaging-licensing/sales-packaging>

Hungary – Ökopannon

Fees 2024 According to the legislations in Hungary all companies are obliged to pay an environmental tax (official name: environmental product charge) to the National Tax and Customs Administration (abbreviated Hungarian name: NTCA).

The object of the charge is the packaging material instead of the packaging and therefore packers are directly not subject of the law for domestic products.

In case of products produced abroad the importer company is responsible for the charge, i.e. the company who imports, and sells the product in Hungary at the first time (with the first HU-VAT Nr. invoice), or uses it for their own purposes.

The product charge tariffs for packaging materials are the following in 2024: Packaging materials:

Material flow	Product charge tariff (HUF/kg)
Plastic (excluding plastic carrier bags)	57
Plastic carrier bags (excluding plastic carrier bags made of biodegradable plastics)	1 900
Plastic carrying bag made of biodegradable plastic	500
Composite (excluding composite laminated beverage containers)	57
Composite laminated beverage containers	19
Metal (excluding metal cans for beverages)	19
Metal cans for beverages	57
Wood, material of natural origin	19
Glass	19
Other	57

Green Dot trademark - Isolated use of the Green Dot trademark

Our company provides the legal usage of Green Dot trademark for producers, importers and retailers as well.

1. Contract based on packaging emission report once a year - In this case the Licensee shall send the Licensor a packaging emission report once a year and pay 1.5 EUR/ton by the amount of the packaging emission.

2. Contract according to categories presented in the following chart:

Annual amount of the packaging emission (ton)	Annual fee	Packaging category
above 10,000 ton	EUR 9 000	A
between 5,000 ton – 10,000 ton	EUR 6 000	B
between 3,000 ton – 4,999 ton	EUR 3 000	C

Services of ÖKO-Pannon

Consultancy service:

Due to a legislation of environmental product charge put into force in January 2012, ÖKO-Pannon Plc. has launched consultancy service on compliance with actual environmental product charge and waste law for packaging emitters.

- Notification obligation
- Environmental product charge declaration
- Environmental product charge refund process
- Providing the use of Green Dot trademark

Optimization consultancy with relation to products liable to product charge (batteries; packaging products; other petroleum products; electric appliances and electronic equipment; tires; commercial printing paper; other plastic products; other chemical products; paper stationery) including:

- interpretation and use of laws in force regulating product charge with consideration to the company's range of products
 - classification of packaging materials
 - creating the system of taking over the liabilities
 - forming the textual content of invoices (incoming, outgoing)
 - classification of product packaging into the proper product charge category o updating background administration in accordance with new laws
 - preparing reports to NAV (National Tax and Customs Administration)
 - review of NAV reports both in terms of running year and previous years o continuous availability
 - on-site consultancy
 - petition of stance from NAV
- Consultancy on individual exemption and coordination
 - Preparing for compliance with the actual law on waste management
 - Preparing for compliance with the packaging regulation
 - Supervision related to the fulfillment of recovery and recycling obligation and product charge reports
 - Consultancy in the field of fulfillment of international recovery and recycling obligation (sending in contracts and reports)
 - Consultancy in the field of single use plastic (SUP)
 - Packaging or not packaging – providing professional opinion according to the laws in force
 - interpretation and use of laws in force regulating product charge with consideration to the company's range of products
 - classification of packaging materials
 - creating the system of taking over the liabilities
 - forming the textual content of invoices (incoming, outgoing)
 - classification of product packaging into the proper product charge category

- Businesses are required to determine the weights of packaging they handle or supply. Repak is here to help, guide and support every 'Major Producer' along the way.
- If your business has been trading for longer than one year it is liable for back fees. Repak has two methods for businesses joining as Regular Members:

STANDARD JOINING PROCESS

- Full compliance after the submission of up-to-date packaging statistics and when invoices are paid in full.

FAST TRACK PROCESS

- Compliance achieved at the start of the process through the payment of an initial joining fee. Full compliance is then provided after the submission of up-to-date packaging statistics and when invoices are paid in full. This option is available at Repak's discretion and is subject to terms and conditions.

PACKAGING STATISTICS & TRAINING

- When joining Repak it may be the first time that your business has compiled an expert service that can support your business every step of the way.

Repak can support your business in the following ways:

COMPLIMENTARY PACKAGING AUDIT

- Repak can conduct an audit to see if your business has an obligation with the Packaging Regulations - at no cost.

FREE STATISTICAL TRAINING

- Provision of free training at your premises to calculate the quantity of packaging your business places on the Irish market. Training will be provided within two weeks of submitting an application form and is usually divided into two components; the first is a broad overview of the Regulations; the second is tailored information relevant to your business.

FIRST COMPLETED PACKAGING RETURNS

- Repak can submit your business' initial Packaging Returns at no charge, making it straightforward to become a Repak Member.

YEARLY PACKAGING STATISTICS

- Once you have joined Repak, we can provide details of approved consultants that can be employed by your company to help in the collation and provision of on-going, yearly packaging statistics. Statistics are required bi-yearly; February (July to December the previous year) and August (January to June of the current year).

For further information or to book training, please contact our Sales team on 01 4670190 or email sales@repak.ie

€ 46,001 and over	12 pro-rata monthly payments due 1st week of each month.

Netherlands – Afvalfonds Verpakkingen

Fees 2024

The Packaging Waste Management Fee has various rates, depending on the type of material. For instance, you pay a lower rate for cardboard than for plastic. The rate per category of material is determined by the costs involved in collecting, separating and recycling that specific material. In short, readily recyclable packaging is not only good for the environment but also for your wallet. Part of the rate comprises the general system costs, these being the costs incurred for monitoring recycling and prevention of litter, amongst other things. These costs are evenly distributed over the categories of material. By clicking on the link you will find information as well as detailed cost overviews for the year 2024

Green Dot Fees

For clients affiliated to the collective system set-up by Eco-Rom Ambalaje, the fee for using “The Green Dot” trademark is included in the recycling and recovery compliance fee. Obligated companies who are not affiliated to Eco-Rom Ambalaje, but use the “The Green Dot” trademark on their packaging placed on the Romanian market, have to sign a dedicated licence agreement for the use of the trademark and pay a fee equivalent to **0.50 euro/ton (VAT excluded)**.

The fee refers to the entire annual quantity of packaging placed on the market based on the individual declaration of the producers or importers or packaged goods.

Serbia – Sekopa

Sekopak's fees for packaging waste management in 2024

Material	RSD/ Kg*
Paper/ cardboard	3.974
Glass	6.769
Metal	3.459
Wood	5.060
Other	0.000
*The above fees do not include VAT	

On the fees, described in the table above

For Sekopak members fee for using the trademark "The Green Dot" is already calculated in the Sekopak's fees for packaging waste management in 2024.

Obliged companies who are not members of Sekopak and use the trademark "The Green Dot" on their packaging placed on the Serbian market, have to sign the isolated licence agreement with Sekopak for the use of "The Green Dot" based on The Green Dot license fees.

The Green Dot license fees

Overall packaging waste quantity placed by the User on the Republic of Serbian market (tons)*	Yearly overall fee (EUR)
0-99	150,00
100 – 499	540,00
500 – 999	890,00
1000 - 1999	1.500,00
2000 - 2999	2.050,00
3000 – 3999	4.150,00
4000 – 5999	7.050,00
> 6000	9.500,00

* Overall packaging waste quantity based on the last yearly Report on packaging and packaging waste that the User reported to the authorized Agency of the Republic.

* Other rigid plastics: includes rigid PP, rigid PS, rigid PVC, rigid EPS and other rigid plastics

** Film and flexible plastics: includes flexible PET, flexible LDPE, flexible HDPE, flexible PP, flexible EPS, and other flexible plastics

*** Fee to be reviewed in the last quarter of 2023

PRO-Europe Participation Costs Overview 2024

***** Other materials: materials not falling under any of the other categories are covered in this section

Turkey – ÇEVKO

Fees 2024

According to the legislations in Turkey all companies are obliged to pay “recovery contribution fee” to the government, specifically to the Ministry of Finance. The fee is paid for packaging and other products that cause waste based on a list of items. In case of packaging, the fee is paid by the packers, fillers and importers and the list includes packaging made of glass, metals, plastics, paperboard, composites and wood.

ÇEVKO offers contracts for the use of “the Green Dot” trademark in Turkey.

The annual fixed fee for the use of the Green Dot logo for packaging circulated in Turkey in 2024 is 10.725 Turkish Lira (TL) + V.A.T.

Please note that the trademark usage contract only covers the cost for use of “the Green Dot” trademark on packaging put on the market in Turkey. When it is signed, it gives the approval to mark the sales packages with the trademark in Turkey.

United Kingdom – Valpak

I am pleased to inform you that Valpak will not be changing the fees payable under your scheme sub licence for 2024. The fees will therefore remain at the current rate of £6.95 per member registered with the appropriate agency, and a flat rate of £350 from 1st January 2024.

The fees cover the costs borne by Valpak for administering and monitoring usage of the trademark. We hope you agree the fees represent good value for continued use of the trademark by all your members. For information, the sub-license fee for individual licence holders that register directly with Valpak will also remain at £295 per company for 2024.

Individual licence fee for 2024 - £295 + VAT

We have also included with this letter a “Green Dot – Guidance for Schemes with a Sub License Agreement” document, which sets out details of the requirements for Sub Licensors and frequently asked questions section which we hope you find useful. In particular we would like to draw your attention to the requirement for schemes to provide information to:

- The name of all companies in your scheme granted a Scheme Licence;
- The date the Scheme Licence was granted; and
- A description of the packaging (including relevant brand names) on which the licensee displays the Green Dot.

Please find included in this letter a Licensee details request. We have also provided copies of the latest Green Dot Standards of Use and Code of Practice documents which should be provided to scheme licensees and the most recent version are also available on the Valpak website: <http://www.valpak.co.uk/compliance-services/green-dot>

The overview of participant costs for 2024 is not guaranteed to be completely accurate; adjustments may be made in the course of the year.
