## Forward

International comparisons and benchmarking of European packaging recovery systems is a complex issue – very often such efforts result in “comparing apples with oranges” or worse. There are several factors affecting fee levels which should be taken into account when comparing the relative costs of compliance across various European schemes. Major factors influencing relative compliance costs include the following:

- Existing national collection and recovery infrastructure in the waste management sector – both for packaging waste as well as other waste streams – e.g. residual and organic waste.
- The source of packaging used to meet national recycling quotas (household only or all packaging, including industrial and transport packaging). Household packaging waste is more expensive to collect and recover than packaging waste arising at production or retail outlets.
- The proportionate share of costs which industry bears: Some schemes meet 100% cost of collection and recovery cost, while others only pay a share thereof, and the rest is paid by the municipalities/fees from consumers.
- National recycling targets and the effect of derogations for some member states.
- Collection system used - bring systems are generally less expensive than kerbside collection from households, but deliver less material for recycling.
- Geographic location and population density - Remote and sparsely populated regions will generally be more difficult and expensive to collect from.
- Enforcement influences costs: The more companies participate in the scheme and the lower the rate of freeriders, the greater the spread of the cost base, and the lower the cost for the individual company.
- Labour costs and general overheads differ depending on the prevailing local economic conditions.
- National waste legislation and enforcement: some countries have a comprehensive landfill ban in effect, while others still are striving to manage largely unstructured waste disposal.

The present document provides an overview about the costs of participation in the respective national recovery systems for packaging and packaging waste for 2025 (where available). All figures have been sent to us by the respective systems and have been compiled to the best of our knowledge. Nevertheless, this information is subject to change without prior notice to us and we therefore cannot guarantee its accuracy and applicability to each packaging. We therefore kindly ask you to get in touch with the respective system(s) of your country(ies) of operation to obtain the latest information relevant to you. Should you have any further questions, please feel free to contact me.

Best regards

Ursula Denison

Director of PRO Europe s.r.l.  
Avenue de Cortenbergh 71 1000 Brussels

## Austria – ARA Altstoff Recycling Austria AG

Household packaging	from 01.01.2024	from 01.01.2025
1.01.0 Paper, household	0.190	0.190
1.02.0 Glass, household	0.102	0.102

## Bulgaria – EcoPack

*Dear partners,*

We are delighted to inform you that in 2025 ECOPACK Bulgaria is once again able to guarantee the effective fulfillment of your recovery and recycling obligations for packaging waste in accordance with the Bulgarian Waste Management Act.

As of 01.01.2025 the base license fees and the current policy for discounts for timely reporting and payment are, as follows:

Material	Base fee	After 10% discount for timely reporting till 15 <sup>th</sup> of next month	After additional 20% discount for timely payment till 25 <sup>th</sup> of next month
SUPP – plastic beverage bottles up to 3 l.	0,255	0.2295	0.184
All other plastics	0,232	0.209	0.167
Paper and cardboard	0,218	0.196	0.157
Glass	0,259	0.233	0.1865
Steel	0,119	0.107	0.086
Aluminum	0,279	0.251	0.201
Composites	0,298	0.268	0.215
Wood	0,118	0.106	0.085
Others	0,311	0.280	0.224
<p><i>Fees are in BGN, per kilogram, excluding VAT</i></p> <p><i>Indicated fee discounts apply only for reported quantities more than 10 tons per annum.</i></p> <p><i>Minimum annual fee for 1 obliged company BGN 150, excluding VAT</i></p>			

In the hope that we will start a fruitful long-term partnership in the field of environmental protection, we remain at your disposal for any further information.

## Croatia – Eko-Ozra

Until a new decision is made on the amount of the fee, which the Environmental Protection and Energy Efficiency Fund (EPEEF) will bring no later than 7 March 2025, when determining the amount of the waste management fee, the eco-modulation coefficient which amounts to 1, coefficient of data submission to the Registry which amounts to 1, and following unit fees shall apply:

The Environmental Protection and Energy Efficiency Fund (EPEEF)

### Waste disposal fee by the type of materials and weight

Material	EUR/t
PET	54,42
Al cans	54,42
Fe cans	29,86
Paper, cardboard	49,77
<ul style="list-style-type: none"><li>Multilayered (composite) packaging with predominantly paper-cardboard component for drinks</li></ul>	54,42
<ul style="list-style-type: none"><li>Multilayered (composite) packaging with predominantly paper-cardboard component - other</li></ul>	99,54
Wood	19,91
Plastic bags	199,08
Textile	19,91
Other polymeric materials	99,54
Other polymeric materials (milk and dairy products)	54,42
Glass	19,91

### Returnable fee for unit of primary packaging for drinks shall be 0.10 euros.

Returnable fee shall be paid for single-use packaging for drinks made of PET (polyethylene terephthalate), glass or metal, which is of volume that equals or is greater than 0.20 litres up to the volume that equals or is less than 3 litres. *(Beverage shall mean a drinkable product, i.e. alcoholic beverage, non-alcoholic drink, table, natural mineral water and spring water, fruit syrups, fruit juices and nectars, milk and liquid dairy products and other liquid products on the basis of fruit or other basis, and any*

other additive that packaged together with a liquid base makes a complete primary packaging unit.)

Other fees for beverage packaging - volumes 0,2-3,0 L (PET, Al, Fe, glass)

• Waste disposal fee per packaging 0,01327 EUR

• Waste disposal fee per packaging( milk and dairy products) 0,00265 EUR

Fee for the usage of the Green Dot trademark (charged by Eko-Ozra) stays the same (mechanism of its calculation as well)

• small companies\* pay fixed fee of 929,12 EUR per year

• medium companies\* pay fixed fee of 1592,78 EUR per year

• large companies pay\* fixed fee of 3185,56 EUR per year

\*Size of the company-user is determined based on Croatian Chamber of Economy Registrar

The Environmental Protection and Energy Efficiency Fund shall determine the amount of waste management fee that is to be paid by the product producer pursuant to the Regulation on Waste Management and Returnable Fee (OG 137/2024) and pursuant to the data submitted to the Registry on the quantity of products placed on the market or pursuant to data established by the Ministry of Finance – Customs Directorate.

When determining the amount of the waste management fee, the coefficient of data submission to the Registry shall apply, which:

- amounts to 1 when the waste management fee is calculated pursuant to the quantity of the product that the producer placed on the market in the territory of the Republic of Croatia and that producer has submitted to the Registry by the 20<sup>th</sup> day of the month for the previous month, or by January 20 of the current year for the previous calendar year, for products in returnable packaging
- amounts to 1.5 when the waste management fee is calculated pursuant
- 
- 
- to data on the quantity of the product that the producer placed on the market in the territory of the Republic of Croatia and that the producer has submitted to the Registry up to three months from the deadline referred to in previous item
- amounts to 5 in all other cases.

EPEEF shall determine the amount that the producer of the product is obliged to pay to the Fund for returnable fee until the end of the calendar month for the previous calendar month, pursuant to the data on the quantity of products placed on the market which were submitted to the Registry or pursuant to the data established by the Ministry of Finance – Customs Directorate.

#### WASTE MANAGEMENT FEE FOR PACKAGING

Waste management fee shall be paid for all packaging except for:

- primary packaging for medicine for which, pursuant to the regulation governing the management of medicinal waste, there is an obligation of takeover at the pharmacy
- packaging which, once it becomes waste, is hazardous waste,

#### **Unit fee for packaging is determined according to the type of packaging material for:**

- polymers, including polyethylene terephthalate and plastic bags

- aluminium
- iron
- paper/cardboard
- multilayered (composite) packaging
- wood
- textile
- glass
- other materials.

Unit fee according to the type of packaging material for packaging for milk and liquid dairy products is 55% of the amount of unit fee for packaging of other products in appropriate packaging material.

**The amount of waste management fee for packaging which is not encompassed with the returnable fee system is calculated according to the following formula:**

a) for single-use packaging (non-returnable packaging)

$$NGOA = JNA \times mA \times kE \times kR$$

where:

NGOA – is the amount of waste management fee for packaging in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mA – is the packaging mass in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

**b) for reusable packaging (returnable packaging)**

$$NGOPA = JNA \times (mA - mOA) \times kE \times kR$$

where:

NGOPA – is the amount of waste management fee for reusable packaging in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mA – is the packaging mass in kilograms

mOA – is the packaging mass in kilograms that the producer has proclaimed to be waste and has submitted with the accompanying document to the person authorised for processing of this waste packaging

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

***The amount of waste management fee for packaging encompassed with the returnable fee system, is calculated according to the following formula:***

$$NGOAP = NVM + NJ$$

where:

NGOAP – is the amount of the waste management fee for packaging in euros

NVM – is the amount for packaging according to the type of packaging material in euros

NJ – is the amount for packaging according to the number of packaging units in euros.

The amount for packaging according to the type of packaging material is calculated according to the following formula:

$$NVM = JNA \times mAP \times kE$$

where:

NVM – is the amount for packaging according to the type of packaging material in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mAP – is the packaging mass expressed in kilograms

kE – is the eco-modulation coefficient.

The amount for packaging according to the number of packaging units is calculated according to the following formula:

$$NJ = JNAB \times BJ \times kR$$

where:

NJ – is the amount for packaging according to the number of packaging units in euros

JNAB – is the unit fee for packaging according to the number of packaging units expressed in euros per packaging unit

BJ – is the number of packaging units in the returnable fee system

kR – is the coefficient of the data submission to the Registry.

Unit fee for packaging according to the number of packaging units is 0.01327 euros, except for the packaging for milk and liquid dairy products that is 0.00265 euros.

In order to avoid double charging of the waste management fee, for the packaging for which the waste management fee is charged pursuant to Annex VII of this Regulation, the waste management fee according to this Annex of the Regulation shall not be charged.

#### ANNEX VII

##### WASTE MANAGEMENT FEE FOR PRODUCTS FROM LIST E

Waste management fee is paid for plastic products for single-use listed in list E of the Annex III of the Act.

The amount of waste management fee for plastic products for single-use shall be calculated according to the following formula:

$$NGOPP = JNPP \times mPP \times kE \times kR$$

where:

NGOPP – is the amount of waste management fee for plastic products for single-use expressed in euros.

JNPP – is the unit fee for plastic products for single-use expressed in euros per kilogram of plastic products for single-use.

mPP – is the mass of plastic products for single-use expressed in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

#### ANNEX VIII

##### WASTE MANAGEMENT FEE FOR FISHING GEAR CONTAINING PLASTIC

Waste management fee shall be paid for every item or piece of gear used for fishing or aquaculture in order to seek, catch or breed maritime biological resources or which floats on the sea surface and is used for attracting and catching or breeding such maritime biological resources, and which contain plastic.

The amount of waste management fee for fishing gear containing plastic is calculated according to the following formula:

$$NGORA = JNRA \times mRA \times kE \times kR$$

where:

NGORA – is the amount of waste management fee for fishing gear containing plastic expressed in euros

JNRA – is the unit fee for fishing gear containing plastic expressed in euros per kilogram of fishing gear containing plastic

mRA – is the mass of fishing gear containing plastic expressed in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

Waste management fee for fishing gear containing plastic is zero euros for fisherman and tradesman for fishing gear that he has produced and used by himself.

Eco-modulation coefficient for fishing gear containing plastic should ensure motivation to submit waste fishing gear containing plastic into the waste management system for fishing gear containing plastic.

## Cyprus – Green Dot Cyprus

An update of the price list for the year 2025 has not been made yet.

The Green Dot Cyprus website will keep you informed [Packaging Fees - Green Dot Cyprus](#)

## Czech Republic – Eko-Kom

Price list for ensuring compliance with the obligation to take-back and recovery of packaging waste through the EKO-KOM system

Discount on 1 tonne of recycled PET beverage bottles 2)	10.500 CZK / t
Fee under the Contract on Collective Compliance of Part III Art. VII. Par. 2 of the General Terms and Conditions	1.600 CZK / year

All prices are without VAT. The invoices are issued in CZK only.

- Packaging that does not meet the criteria of Section 13, Par. 3 of the Packaging Act No. 477/2001 Coll., and packaging and packaging means listed in Part D of Annex No. 4 to the Packaging Act No. 477/2001 Coll.
- In the case of PET sales packaging which contain beverages and is rigid or hollow rigid containers with a capacity of up to 3 litres, the amount of the remuneration shall be determined as follows:
  - on the basis of the relevant unit rates of the Price list, the amount of the remuneration shall be determined for that part of the packaging which consists of primary PET and for that part of the packaging which consists of recycled PET (rPET);
  - furthermore, the amount of the recycling discount shall be determined as a multiple of the unit rate of that discount and the weight of the rPET part of the packaging, up to a maximum weight equivalent to 35% of the weight of the PET packaging in question;
  - the amount of the remuneration for the PET packaging in question shall then be determined by deducting the recycling discount from the sum of the remuneration for the primary PET packaging and the remuneration for the rPET packaging; if the amount of the remuneration would then be negative, the remuneration for the PET packaging in question shall be zero.

The meaning of terms used in the Price List is given in Article II. of the General Terms and Conditions of EKO-KOM, a.s. governing the rights and obligations arising from the Contract of Collective Compliance.

from Citeo can be found here  
[Citeo Guide Tarif 02.10.24 EN.pdf](#)

## Germany - Der Grüne Punkt - Duales System Deutschland GmbH Fees 2025

DSD offers separate contracts for participation in the compliance scheme and use of the trademark “Der Grüne Punkt” in Germany.

- A. The compliance fees (fee for participation in the dual system of Der Grüne Punkt) are based on weight and material type of the packaging. Interested companies can receive an offer via the customer portal «VerpackGO»: [Your license calculator \(gruener-punkt.de\)](https://www.gruener-punkt.de)

The materials are separated into 8 categories:

- |                     |  |
|---------------------|--|
| 1. Glass            | 5. Plastics                                |
| 2. Paper, Cardboard | 6. Composite carton (beverage carton etc.) |
| 3. Tinplate         | 7. Miscellaneous composites                |
| 4. Aluminium        | 8. Organic materials                       |

For determining the fee, first the packaging has to be separated in all its parts, sorted by categories. The weight, multiplied by the price for each material and by the number of packaging put on market is the fee for the participation in our packaging recovery system.

- B. The fees for the **isolated trademark use “Der Grüne Punkt”** (“The Green Dot”) for packaging circulated in Germany are:

MATERIAL	EURO/TON
Glass	1.00
Paper/board/cardboard	3.00
Ferrous metals	5.00
Aluminium	13.00
Plastics	17.00
Beverage carton packaging	13.00
Other Composites packaging	13.00
Other Materials	2.00

Please note that the trademark usage contract **only covers the cost for use of the trademark "Der Grüne Punkt" on packaging put on market in Germany**. When you sign it, you receive the approval to mark your sales packages with our globally protected trademark. However, with the trademark usage contract alone, you will

*PRO Europe – Participation Costs Overview 2025*

**not be meeting your obligations under the German Packaging Ordinance.** For this purpose, you will have to conclude an appropriate **participation agreement with a dual system**/compliance scheme. The trademark usage and participation contracts offered by Der Grüne Punkt can each be concluded separately from each other. More information can be found on our website:

<https://www.gruener-punkt.de/en/packaging-licensing/sales-packaging>

## Greece – H.E.R.R.C.O

### HRRCO LICENSE FEES

a. Fixed contribution on the number of packaging	0,0004 €
b) Contribution by weight (€/ton)	
PAPER / CARDBOARD	55,50
-Transfer paper / cardboard	55,50
-Other paper / cardboard	55,50

## Hungary – ÖKO-Pannon Nonprofit Plc.

On March 14, 2023, „**80/2023. (III.14.) government decree**” on the detailed rules for the operation of the extended producer responsibility system (**EPR**) was published.

Products subject to EPR charges:

- packaging
- SUP – single use of plastic
- electric appliances and electronic equipment
- batteries and accumulators
- motor vehicles
- tires
- office paper
- commercial printing paper
- cooking oil and grease
- textile products
- wooden furniture

**The EPR fees are the following in 2025:**

a) Packaging

<b>Material flow</b>	<b>EPR fee [HUF/kg]</b>
Plastic	219
Paper and cardboard	173
Metal	186
Other packaging	129
Wood	19
Textil	67
Glass	77
Composite laminated beverage containers	168

b) Single use plastic products

<b>Description</b>	<b>EPR fee [HUF/kg]</b>
plastic food containers - empty	219
plastic food containers – packaging	219
packet or wrapper made from flexible material containing food for immediate consumption from the packet or wrapper without any further preparation	219
bottles (up to three litres) - Product with no mandatory redemption fee	219/168
plastic bottles (up to three litres) – product subject to a mandatory redemption fee	219
cups for beverages - empty, including their covers and lids	219/168
cups for beverages - packaging, including their covers and lids	219/168
lightweight plastic carrier bags (wall thickness below 50 microns) - empty	219
lightweight plastic carrier bags (wall thickness below 50 microns) – packaging	219
wet wipes	113
balloons	113
tobacco products with filters and filters marketed for use in combination with tobacco products	113
fishing gear containing plastic	113

c) WEEE

<b>Description</b>	<b>EPR fee [HUF/kg]</b>
Temperature exchanger equipment	116
Screens, monitors, and equipment containing screens having a surface greater than 100 cm <sup>2</sup>	362
Lamps	306
Large equipment (any external dimension more than 50 cm)	124

Large luminaries (any external dimension more than 50 cm)	124
Photovoltaic cells assembled in modules or made up into panels (any external dimension more than 50 cm)	63
Small equipment (no external dimension more than 50 cm)	261
Small luminaries (any external dimension less than 50 cm)	261
Small IT and telecommunication equipment (no external dimension more than 50 cm)	261

d) Other product categories

<b>Description</b>	<b>EPR fee</b> [HUF/kg]
Portable battery and accumulator	160
Industrial battery and accumulator	239
Vehicle battery and accumulator	238
Tires	137
Paper stationery	128
Commercial printing papers	94
Cooking oil and fat	36
Textile products	145
Wooden furnitures	17
Vehicles	21

## Deposit Return System connection and service fees

450/2023. (X.4.) government decree on the detailed rules for determining and applying the redemption fee and for distributing products with a redemption fee

Connection fee unit rate

<b>Material flow</b>	<b>Connection fee</b> [HUF/kg]
non-reusable plastic	18
non-reusable metal	23
non-reusable glass	1
reusable	1

Service fee unit rate

<b>Material flow</b>	<b>Service fee</b> [HUF/kg]
non-reusable plastic	219
non-reusable metal	186
non-reusable glass	77
winery products affected by a flat-rate payment non-reusable glass packaging	25
champagne and sparkling wine affected by a flat-rate payment non-reusable glass packaging	24
reusable	77

## Environmental protection product charge - Act 85 of 2011.

From 1<sup>st</sup> January 2025 according to the **Environmental protection product charge - Act 85 of 2011** the producers of following products should report to the to the National Tax and Customs Administration (abbreviated Hungarian name: NTCA).

Description	Product Charge fee [HUF/kg]
<b>Other plastic products</b>	
Flowers, foliage and fruit of plastics and parts thereof; articles made of artificial flowers, foliage or fruit	1900
Plastic carrier bags, excluding plastic carrier bags made of biodegradable plastic	1661
Plastic carrier bags made of biodegradable plastic	261
<b>Other chemical products</b>	
Soap; organic surface-active agents; washing preparations	11
Cosmetic or toilet preparations	57
<b>Other petroleum products</b>	114

### **Green Dot trademark - Isolated use of the Green Dot trademark**

Our company provides the legal usage of Green Dot trademark for producers, importers and retailers as well.

1. **Contract based on packaging emission report once a year** - In this case the Licensee shall send the Licensor a packaging emission report once a year and **pay 1.5 EUR/ton by the amount of the packaging emission.**

2. **Contract according to categories** presented in the following chart:

Annual amount of the packaging emission (ton)	Annual fee	Packaging category
above 10,000 ton	EUR 9 000	A
between 5,000 ton – 10,000 ton	EUR 6 000	B
between 3,000 ton – 4,999 ton	EUR 3 000	C

### **Services of ÖKO-Pannon**

## Consultancy service

ÖKO-Pannon carries out its consultancy services in connection with the following legislation:

- act LXXXV of 2011 on Environmental Product Fee (hereinafter referred to as the “Product Charge Act”);
- Government Decree No. 80/2023 (III. 14.) on the detailed rules of the operation of the extended producer responsibility system (hereinafter referred to as the “EPR Decree”);
- Government Decree No. 301/2021 (VI. 1.) on the restriction of the placing on the market of certain single-use and certain other plastic products (hereinafter referred to as the “SUP-I”) and Government Decree No. 349/2021 (VI. 22.) on reducing the impact of certain plastic products on the environment (hereinafter referred to as the “SUP-II”);
- Government Decree No. 450/2023 (X. 4.) on the establishment and application of the redemption fee and the detailed rules for the distribution of the redemption fee product (hereinafter referred to as the “DRS”).

Interpretation and use of laws in force with consideration to the company’s range of products:

- Ktdt. notification obligation;
- Ktdt. declaration (hereinafter referred to as the “**declaration**”) obligation;
- Ktdt. refund process;
- Performing tasks related to EPR registration;
- Performing tasks related to EPR data reporting to National Environmental Information System (abbreviated: OKIR);
- Preparation of declaration, self-checking of the previous year or correction of the submitted declaration for products subject to product fee and EPR fee and submission to ÁNYK / OKIR system;
- Performing tasks related to the notification and data provision of certain single-use products;
- Performing reporting and data reporting tasks related to DRS;
- consultancy

## Ireland – Repak

### How are fees calculated?

**Participation fees** are charged at a flat fee per tonne in euro in these categories irrespective of material type: These include licence fees for use of the Green Dot

Fee type	Activity in Supply Chain	Cost EUR/tonne (2025)
Participation fee	Manufacturer	1.00
Participation fee	Convertor	1.00
Material-specific fee	Brandholder/Importer	(see below)
Participation fee	Retailer	2.00

**Material-specific fees** are charged at the brandholder/importer stage of the supply chain and are based on the weight of each participating material placed on the market by members. All fees are calculated on the basis of statistics supplied for previous year placements.

MATERIAL	Cost EUR/tonne (2025)
Recycled Paper/Cardboard	28.54
Recycled Glass	7.41
Recycled Aluminium	3.68
Recycled Steel	64.82
Recycled Rigid Plastic	142.03
Recycled Flexible Plastic	142.03
Non Recycled Plastic	446.07
PET Beverage Bottles	142.03
Other Plastic Beverage Bottles	142.03
Plastic Non Beverage Bottles	142.03
Recycled Wood	14.47
Recycled Composite	142.03
Non Recycled Composite	446.07
Non Recycled Other	221.05

## Israel – Tamir

### Financial Contribution Tariff per Material – 2025

Material	NIS per Ton - Household	NIS per Ton - Commercial

€ 46,001 and over	12 pro-rata monthly payments due 1st week of each month.

## Netherlands – Verpact

### Compliance cost overview 2025

#### Basic principles

- The producer or importer of the packed products, or the foreign web shop (when selling to consumers in a household) is liable to report to Verpact. Deadline: 31<sup>st</sup> March of the following calendar year. Included in the reporting should be:
  - Packaging around products that are imported or sold on the Dutch market
  - Packaging around incoming raw materials (for production) or packaging that are removed after import
  - Packaging used to group or transport individual units of packaging
  - There is a De Minimis threshold of 50,000 kg packaging per year for regular packaging. For packaging in the deposit revenue system or under the SUP directive, there is no de minimis threshold.
  - For producers or importers this means that the first 50,000 kg they place on the market are not invoiced. This is done on a pro rata basis, the company can't choose on what material or packaging the De Minimis Threshold is calculated.
  - The reporting company reports any material of which the packaging consists separately, even if this represents only a minority share in the pack. E.g. in the reporting of beverage cartons, at least paper/cardboard and plastic should be reported, and sometimes also aluminium.
  - Fees are calculated based on the cost of collection of each materials, with some exceptions. In these cases, the cost of collection is calculated for the entire pack.
  - For packaging falling under the SUP Directive, both number of items on the market and the weight of packaging on the market have to be reported. For the weight, the regular fee applies. For the number of items, a surcharge is invoiced in order to cover the cost of collection from the litter.
  - For plastics, there is a new fee modulation programme. If packaging meets some system requirements, it can be eligible for a fee reduction of 5 x € 0.10 per kg fee reduction. These reductions are granted if it can be proven that the pack complies with requirements for:
    - Use of mono material
    - Colouring
    - Recyclability of the label
    - Compliance with KIDV recycle checks
    - Use of post-consumer recycled content
    - Reusable packaging can be reported separately. For this we require:

- The weight of reusable packaging (per material), placed on the market for the 1<sup>st</sup> time in that year (reduced fee)
- The total weight of reusable packaging (per material), placed on the market in that year (no fee)
- Companies that acquire packaging for which the Dutch packaging waste compliance fees were already paid by another company, and who export this packaging, can get a refund for this packaging. Except in the case of plastics, this equals the amount that was initially paid by the Producer or importer who initially paid the fee. For plastics, there is a refund based on a mixed calculation. The programme for this is called “indirect export”.

2025 fees

<https://www.verpact.nl/en/rates>

Packaging or material	Financial contribution per kg (excl. 21% VAT)
<b>MATERIAL-BASED CONTRIBUTION</b>	
All materials must be specified (also in case of laminated packaging), the contribution differs per material	
Glass	€ 0.100
Paper and cardboard	€ 0.017
Rigid plastics	€ 1.220
Flexible or unspecified plastics	€ 1.320
Aluminium	€ 0.300
Other metals	€ 0.360
Wood	€ 0.015
Other material types	€ 0.015
<b>PACKAGING SPECIFIC CONTRIBUTION</b>	
All materials must be specified (also in case of laminated packaging), the contribution applies to each material equally	
Beverage cartons	€ 0.880
Plastic beverage bottles in the deposit revenue system*	€ 0.015
Beverage cans in the deposit revenue system*	€ 0.015
Reusable beverage cups (1 <sup>st</sup> use)	€ 0.280
Other reusable packaging (1 <sup>st</sup> use)	€ 0.015
<b>PACKAGING SPECIFIC CONTRIBUTION, FREE</b>	
All materials must be specified (also in case of laminated packaging), but the contribution is set to zero	
Eenmalige logistieke hulpmiddelen: Specific <a href="#">list of mainly reusable, tertiary packaging</a>	€ 0.000
Reusable packaging, total use	€ 0.000
Packaging or material	Financial contribution per 1,000 items
<b>SINGLE USE PACKAGING SUPPLEMENT</b>	

For SUP items, the number of items and the weight must be reported. For each item, a surcharge is invoiced.	
All packaging of the below types that contain plastics	
Single use beverage cups	€ 2.300
Single use beverage packaging (other than cups)	€ 2.300
Single use plastic food packaging with a rigid element	€ 2.300
Single use flexible food packaging	€ 2.300
Lightweight carrier bags (< 50 micron)	€ 2.300

\* For plastic beverage bottles and cans up to 3 l content, there is a legal obligation to participate in the Deposit Revenue system. Excluded of this obligation are milk and juices.

## Türkiye – ÇEVKO

### Fees 2025

According to the legislations in Türkiye all companies are obliged to pay “recovery contribution fee” to the government, specifically to the Ministry of Finance. The fee is paid for packaging and for other products that cause waste based on a list of items. In case of packaging, the fee is paid by the packers, fillers and importers and the list includes packaging made of glass, metals, plastics, paper, board, composites and wood.

### **ÇEVKO offers contracts for the use of the Green Dot trademark in Türkiye.**

The annual fixed fee for the use of the Green Dot logo for packaging circulated in Türkiye in 2025 is 15.550 Turkish Lira (TL) + V.A.T.

When it is signed, the Green Dot Sublicence Contract with ÇEVKO gives the company the approval to mark the sales packages with the trademark in Türkiye. Being a financial mark, the Green Dot indicates that the company financially contributes to the projects and activities of ÇEVKO, including but not limited to awareness raising, training, infrastructure building, for sustainable collection, sorting and recycling of packaging waste in Türkiye.
