## Preamble

International comparisons and benchmarking of European packaging recovery systems is a complex issue – very often such efforts result in “comparing apples with oranges” or worse. There are several factors affecting fee levels which should be taken into account when comparing the relative costs of compliance across various European schemes. Major factors influencing relative compliance costs include the following:

- Existing national collection and recovery infrastructure in the waste management sector – both for packaging waste as well as other waste streams – e.g. residual and organic waste.
- The source of packaging used to meet national EPR recycling quotas (household only or all packaging, including industrial and transport packaging). Household packaging waste is more expensive to collect and recover than packaging waste arising at production or retail outlets. If PROs cover several packaging streams, it has to be clear which cost are allocated to which segment (separate pricing, mixed pricing...)
- The proportionate share of costs which industry bears: Some PRO cover 100% cost of collection and recovery cost, while others only pay a share thereof, and the rest is paid by the municipalities/direct fees from consumers.
- National recycling targets (e.g. above the minimum required for all EU countries) and the effect of derogations for some member states.
- Impact of existing DRS regulation on the PRO – is the DRS stream handled separately or by the PRO itself?
- Collection system used - bring systems are generally less expensive than kerbside collection from households, but deliver less material for recycling as it puts more burden on consumers to bring their empty packaging to central collection sites.
- Geographic location and population density - Remote and sparsely populated regions will generally be more difficult and expensive to collect from.
- Enforcement influences costs: The more companies participate in the scheme and the lower the rate of free riders, the greater the spread of the cost base, and the lower the cost for the individual company.
- Labor costs and general overheads differ depending on the prevailing local economic conditions.
- National waste legislation and enforcement: some countries have a comprehensive landfill ban in effect, while others still are striving to manage largely unstructured waste disposal.

The present document provides an overview of the costs of participation in the respective national recovery systems for packaging and packaging waste for 2026 (where available). All figures have been sent to us by the respective systems and have been compiled to the best of our knowledge. Nevertheless, this information is subject

to change without prior notice to us and we therefore cannot guarantee its accuracy and applicability to each packaging. We therefore kindly ask you to get in touch with the respective system(s) of your country(ies) of operation to obtain the latest information relevant to you. Should you have any further questions, please feel free to contact me.

Best regards

Ursula Denison

Director of PRO Europe s.r.l.

Avenue de Cortenbergh 71 1000 Brussels

## Bulgaria - EcoPack

Dear partners, We are delighted to inform you that in 2026 ECOPACK Bulgaria is once again able to guarantee the effective fulfillment of your recovery and recycling obligations for packaging waste in accordance with the Bulgarian Waste Management Act.

In connection with the accession of the Republic of Bulgaria to the eurozone, from 01.01.2026 the euro will become the only legal currency in the country.

| Material  | Base fee | After 10% discount for timely reporting till 15 <sup>th</sup> of next month | After additional 20% discount for timely reporting till 25 <sup>th</sup> of next month |
|---|----------|---|--|
| SUPP – plastic beverage bottles up to 3 l.  | 0,151    | 0,136   | 0,109  |

## Croatia – Eko-Ozra

The Environmental Protection and Energy Efficiency Fund will adopt a decision on the new amounts of waste management fees by January 2026.

The decision will be published on the official website of the Fund at the following link:

<https://www.fzoeu.hr/hr/naknada-gospodarenja-otpadom-za-ambalazu-i-ambalazni-otpad/1407>

Until the adoption and publication of the new decision, the currently applicable fee amounts shall remain in force, as set out in this document.

The Environmental Protection and Energy Efficiency Fund (EPEEF)

### Waste disposal fee by the type of materials and weight

| Material   | EUR/t  |
|--|--------|
| PET  | 54,42  |
| Al cans  | 54,42  |
| Fe cans  | 29,86  |
| Paper, cardboard   | 49,77  |
| <ul style="list-style-type: none"> <li>• Multilayered (composite) packaging with predominantly paper-cardboard component for drinks</li> </ul> | 54,42  |
| <ul style="list-style-type: none"> <li>• Multilayered (composite) packaging with predominantly paper-cardboard component -other</li> </ul>     | 99,54  |
| Wood   | 19,91  |
| Plastic bags   | 199,08 |
| Textille   | 19,91  |
| Other polymeric materials  | 99,54  |
| Other polymeric materials (milk and dairy products)  | 54,42  |
| Glass  | 19,91  |

Returnable fee for unit of primary packaging for drinks shall be 0.10 euros.

Returnable fee shall be paid for single-use packaging for drinks made of PET (polyethylene terephthalate), glass or metal, which is of volume that equals or is greater than 0.20 litres up to the volume that equals or is less than 3 litres. (*Beverage shall mean a drinkable product, i.e. alcoholic beverage, non-alcoholic drink, table, natural mineral water and spring water, fruit syrups, fruit juices and nectars, milk and liquid dairy products and other liquid products on the basis of fruit or other basis, and any other additive that packaged together with a liquid base makes a complete primary packaging unit.*)

Other fees for beverage packaging - volumes 0,2-3,0 L (PET, Al, Fe, glass)

- Waste disposal fee per packaging 0,01327 EUR
- Waste disposal fee per packaging (milk and dairy products) 0,00265 EUR

Fee for the usage of the Green Dot trademark (charged by Eko-Ozra) stays the same (mechanism of its calculation as well)

- small companies\* pay fixed fee of 929,12 EUR per year
- medium companies\* pay fixed fee of 1592,78 EUR per year
- large companies pay\* fixed fee of 3185,56 EUR per year

\*Size of the company-

user is determined based on Croatian Chamber of Economy Registrar

The Environmental Protection and Energy Efficiency Fund shall determine the amount of waste management fee that is to be paid by the product producer pursuant to the Regulation on Waste Management and Returnable Fee (OG 137/2024) and pursuant to the data submitted to the Registry on the quantity of products placed on the market or pursuant to data established by the Ministry of Finance – Customs Directorate.

When determining the amount of the waste management fee, the coefficient of data submission to the Registry shall apply, which:

- amounts to 1 when the waste management fee is calculated pursuant to the quantity of the product that the producer placed on the market in the territory of the Republic of Croatia and that producer has submitted to the Registry by the 20<sup>th</sup> day of the month for the previous month, or by January 20 of the current year for the previous calendar year, for products in returnable packaging
- amounts to 1.5 when the waste management fee is calculated pursuant to data on the quantity of the product that the producer placed on the market in the territory of the Republic of Croatia and that the producer has submitted to the Registry up to three months from the deadline referred to in previous item
- amounts to 5 in all other cases.

EPEEF shall determine the amount that the producer of the product is obliged to pay to the Fund for returnable fee until the end of the calendar month for the previous calendar month, pursuant to the data on the quantity of products placed on the market which were submitted to the Registry or pursuant to the data established by the Ministry of Finance – Customs Directorate.

#### WASTE MANAGEMENT FEE FOR PACKAGING

Waste management fee shall be paid for all packaging except for:

- primary packaging for medicine for which, pursuant to the regulation governing the management of medicinal waste, there is an obligation of takeover at the pharmacy
- packaging which, once it becomes waste, is hazardous waste,

#### **Unit fee for packaging is determined according to the type of packaging material for:**

- polymers, including polyethylene terephthalate and plastic bags
- aluminium
- iron
- paper/cardboard
- multilayered (composite) packaging
- wood
- textile
- glass
- other materials.

Unit fee according to the type of packaging material for packaging for milk and liquid dairy products is 55% of the amount of unit fee for packaging of other products in appropriate packaging material.

#### **The amount of waste management fee for packaging which is not encompassed with the returnable fee system is calculated according to the following formula:**

a) for single-use packaging (non-returnable packaging)

$$NGOA = JNA \times mA \times kE \times kR$$

where:

NGOA – is the amount of waste management fee for packaging in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mA – is the packaging mass in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

**b) for reusable packaging (returnable packaging)**

$$\text{NGOPA} = \text{JNA} \times (\text{mA} - \text{mOA}) \times \text{kE} \times \text{kR}$$

where:

NGOPA – is the amount of waste management fee for reusable packaging in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mA – is the packaging mass in kilograms

mOA – is the packaging mass in kilograms that the producer has proclaimed to be waste and has submitted with the accompanying document to the person authorised for processing of this waste packaging

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

***The amount of waste management fee for packaging encompassed with the returnable fee system, is calculated according to the following formula:***

$$\text{NGOAP} = \text{NVM} + \text{NJ}$$

where:

NGOAP – is the amount of the waste management fee for packaging in euros

NVM – is the amount for packaging according to the type of packaging material in euros

NJ – is the amount for packaging according to the number of packaging units in euros.

The amount for packaging according to the type of packaging material is calculated according to the following formula:

$$\text{NVM} = \text{JNA} \times \text{mAP} \times \text{kE}$$

where:

NVM – is the amount for packaging according to the type of packaging material in euros

JNA – is the unit fee for packaging expressed in euros per kilogram

mAP – is the packaging mass expressed in kilograms

kE – is the eco-modulation coefficient.

The amount for packaging according to the number of packaging units is calculated according to the following formula:

$$NJ = JNAB \times BJ \times kR$$

where:

NJ – is the amount for packaging according to the number of packaging units in euros

JNAB – is the unit fee for packaging according to the number of packaging units expressed in euros per packaging unit

BJ – is the number of packaging units in the returnable fee system

kR – is the coefficient of the data submission to the Registry.

Unit fee for packaging according to the number of packaging units is 0.01327 euros, except for the packaging for milk and liquid dairy products that is 0.00265 euros.

In order to avoid double charging of the waste management fee, for the packaging for which the waste management fee is charged pursuant to Annex VII of this Regulation, the waste management fee according to this Annex of the Regulation shall not be charged.

## ANNEX VII

### WASTE MANAGEMENT FEE FOR PRODUCTS FROM LIST E

Waste management fee is paid for plastic products for single-use listed in list E of the Annex III of the Act.

The amount of waste management fee for plastic products for single-use shall be calculated according to the following formula:

$$NGOPP = JNPP \times mPP \times kE \times kR$$

where:

NGOPP – is the amount of waste management fee for plastic products for single-use expressed in euros.

JNPP – is the unit fee for plastic products for single-use expressed in euros per kilogram of plastic products for single-use.

mPP – is the mass of plastic products for single-use expressed in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

## ANNEX VIII

## WASTE MANAGEMENT FEE FOR FISHING GEAR CONTAINING PLASTIC

Waste management fee shall be paid for every item or piece of gear used for fishing or aquaculture in order to seek, catch or breed maritime biological resources or which floats on the sea surface and is used for attracting and catching or breeding such maritime biological resources, and which contain plastic.

The amount of waste management fee for fishing gear containing plastic is calculated according to the following formula:

$$\text{NGORA} = \text{JNRA} \times \text{mRA} \times \text{kE} \times \text{kR}$$

where:

NGORA – is the amount of waste management fee for fishing gear containing plastic expressed in euros

JNRA – is the unit fee for fishing gear containing plastic expressed in euros per kilogram of fishing gear containing plastic

mRA – is the mass of fishing gear containing plastic expressed in kilograms

kE – is the eco-modulation coefficient

kR – is the coefficient of the data submission to the Registry.

Waste management fee for fishing gear containing plastic is zero euros for fisherman and tradesman for fishing gear that he has produced and used by himself.

Eco-modulation coefficient for fishing gear containing plastic should ensure motivation to submit waste fishing gear containing plastic into the waste management system for fishing gear containing plastic.

## Cyprus – Green Dot Cyprus

| Material                               | EUR per tonne |
|--|---------------|
| <b>Household Packaging</b>             |               |
| Glass                                  | 27.61         |

|--|------------------|
| Discount on 1 tonne of recycled PET beverage bottles 2)  | 6 525 CZK / t    |
| Fee under the Contract on Collective Compliance of Part III Art. VII. Par. 2 of the General Terms and Conditions | 1 600 CZK / year |

**All prices are without VAT. The invoices are issued in CZK only.**

1) Packaging that does not meet the criteria of Section 13, Par. 3 of the Packaging Act No. 477/2001 Coll., and packaging and packaging means listed in Part D of Annex No. 4 to the Packaging Act No. 477/2001 Coll.

2) In the case of PET sales packaging which contain beverages and is rigid or hollow rigid containers with a capacity of up to 3 litres, the amount of the remuneration shall be determined as follows:

shall be determined as follows:

- on the basis of the relevant unit rates of the Price list, the amount of the remuneration shall be determined for that part of the packaging which consists of primary

PET and for that part of the packaging which consists of recycled PET (rPET);

- furthermore, the amount of the recycling discount shall be determined as a multiple of the unit rate of that discount and the weight of the rPET part of the packaging,

up to a maximum weight equivalent to 35% of the weight of the PET packaging in question;

- the amount of the remuneration for the PET packaging in question shall then be determined by deducting the recycling discount from the sum of the remuneration for the primary PET packaging and the remuneration for the rPET packaging; if the amount of the remuneration would then be negative, the remuneration for the PET packaging in question shall be zero.

The meaning of terms used in the Price List is given in Article II. of the General Terms and Conditions of EKO-KOM, a.s. governing the rights and obligations arising from the Contract of Collective Compliance.

VAT will be added to the service fees in amount of 24%

## Germany – Der Grüne Punkt – Duales System Deutschland GmbH

**DSD offers separate contracts for participation in the compliance scheme and use of the trademark “Der Grüne Punkt” in Germany.**

- A. The compliance fees (fee for participation in the dual system of Der Grüne Punkt) are based on weight and material type of the packaging. Interested companies can receive an offer via the customer portal «VerpackGO»: [Your license calculator \(gruener-punkt.de\)](https://www.gruener-punkt.de)

The materials are separated into 8 categories:

- |                     |  |
|---------------------|--|
| 1. Glass            | 5. Plastics                                |
| 2. Paper, Cardboard | 6. Composite carton (beverage carton etc.) |
| 3. Tinplate         | 7. Miscellaneous composites                |
| 4. Aluminium        | 8. Organic materials                       |

For determining the fee, first the packaging has to be separated in all its parts, sorted by categories. The weight, multiplied by the price for each material and by the number of packaging put on market is the fee for the participation in our packaging recovery system.

- B. The fees for the isolated trademark use “Der Grüne Punkt” (“The Green Dot”) for packaging circulated in Germany are:**

| MATERIAL                   | EURO/TON |
|----------------------------|----------|
| Glass                      | 1.00     |
| Paper/board/cardboard      | 3.00     |
| Ferrous metals             | 5.00     |
| Aluminium                  | 13.00    |
| Plastics                   | 17.00    |
| Beverage carton packaging  | 13.00    |
| Other Composites packaging | 13.00    |
| Other Materials            | 2.00     |

Please note that the trademark usage contract **only covers the cost for use of the trademark "Der Grüne Punkt" on packaging put on market in Germany.** When you sign it, you receive the approval to mark your sales packages with our globally protected trademark. However, with the trademark usage contract alone, you will **not be meeting your obligations under the German Packaging Ordinance.** For this purpose, you will have to conclude an appropriate **participation agreement with a dual system/compliance scheme.** The trademark usage and participation

contracts offered by Der Grüne Punkt can each be concluded separately from each other. More information can be found on our website <https://www.gruener-punkt.de/en/packaging-licensing/sales-packaging>

## Hungary – ÖKO-Pannon Nonprofit Plc.

On March 14, 2023, „**80/2023. (III.14.) government decree**” on the detailed rules for the operation of the extended producer responsibility system (**EPR**) was published.

Products subject to EPR charges:

- packaging
- SUP – single use of plastic
- electric appliances and electronic equipment
- batteries and accumulators
- motor vehicles
- tires
- office paper
- commercial printing paper
- cooking oil and grease
- textile products
- wooden furniture

**The EPR fees are the following in 2026:**

### a) Packaging

| Material flow       | EPR fee<br>[HUF/kg] |
|---------------------|---------------------|
| Plastic             | 219                 |
| Paper and cardboard | 173                 |
| Metal               | 186                 |
| Other packaging     | 129                 |
| Wood                | 22                  |
| Textil              | 148                 |
| Glass               | 107                 |
| Composite packaging | 191                 |

### b) Single use plastic products

| Description  | EPR fee<br>[HUF/kg] |
|--|---------------------|
| plastic food containers - empty  | 219                 |
| plastic food containers – packaging  | 219                 |
| packet or wrapper made from flexible material containing food for immediate consumption from the packet or wrapper without any further preparation | 219                 |
| bottles (up to three litres) - Product with no mandatory redemption fee  | 219/168             |

|   |         |
|---|---------|
| plastic bottles (up to three litres) – product subject to a mandatory redemption fee            | 219     |
| cups for beverages - empty, including their covers and lids                                     | 219/168 |
| cups for beverages - packaging, including their covers and lids                                 | 219/168 |
| lightweight plastic carrier bags (wall thickness below 50 microns) - empty                      | 219     |
| lightweight plastic carrier bags (wall thickness below 50 microns) – packaging                  | 219     |
| wet wipes   | 113     |
| balloons  | 113     |
| tobacco products with filters and filters marketed for use in combination with tobacco products | 113     |
| fishing gear containing plastic   | 113     |

c) WEEE

| Description   | EPR fee [HUF/kg] |
|---|------------------|
| Temperature exchanger equipment   | 116              |
| Screens, monitors, and equipment containing screens having a surface greater than 100 cm <sup>2</sup>   | 362              |
| Lamps   | 419              |
| Large equipment (any external dimension more than 50 cm)  | 124              |
| Large luminaries (any external dimension more than 50 cm)   | 124              |
| Photovoltaic cells assembled in modules or made up into panels (any external dimension more than 50 cm) | 63               |
| Small equipment (no external dimension more than 50 cm)   | 261              |
| Small luminaries (any external dimension less than 50 cm)   | 261              |
| Small IT and telecommunication equipment (no external dimension more than 50 cm)                        | 261              |

d) Other product categories

| Description   | EPR fee [HUF/kg] |
|---|------------------|
| Portable battery and accumulator                                | 160              |
| Light vehicle battery and accumulator                           | 239              |
| Electric vehicle battery and accumulator                        | 239              |
| Use for starting, lighting and ignition battery and accumulator | 390              |

|                                    |     |
|------------------------------------|-----|
| Industrial battery and accumulator | 239 |
| Vehicle battery and accumulator    | 238 |
| Vehicles                           | 36  |
| Tires                              | 137 |
| Paper stationery                   | 128 |
| Commercial printing papers         | 94  |
| Cooking oil and fat                | 62  |
| Textile products                   | 164 |
| Wooden furnitures                  | 51  |

### Deposit Return System connection and service fees

450/2023. (X.4.) government decree on the detailed rules for determining and applying the redemption fee and for distributing products with a redemption fee

Connection fee unit rate

| Material flow        | Connection fee [HUF/kg] |
|----------------------|-------------------------|
| non-reusable plastic | 18                      |
| non-reusable metal   | 23                      |
| non-reusable glass   | 1                       |
| reusable             | 1                       |

Service fee unit rate

| Material flow   | Service fee [HUF/kg] |
|---|----------------------|
| non-reusable plastic  | 219                  |
| non-reusable metal  | 198                  |
| non-reusable glass  | 84                   |
| winery products affected by a flat-rate payment non-reusable glass packaging              | 25                   |
| champagne and sparkling wine affected by a flat-rate payment non-reusable glass packaging | 24                   |
| reusable  | 77                   |

## Environmental protection product charge - Act 85 of 2011.

From 1<sup>st</sup> January 2025 according to the **Environmental protection product charge - Act 85 of 2011** the producers of following products should report to the to the National Tax and Customs Administration (abbreviated Hungarian name: NTCA).

| Description   | Product Charge fee [HUF/kg] |
|---|-----------------------------|
| <b>Other plastic products</b>   |                             |
| Flowers, foliage and fruit of plastics and parts thereof; articles made of artificial flowers, foliage or fruit | 1900                        |
| Plastic carrier bags, excluding plastic carrier bags made of biodegradable plastic                              | 1661                        |
| Plastic carrier bags made of biodegradable plastic  | 261                         |
| <b>Other chemical products</b>  |                             |
| Soap; organic surface-active agents; washing preparations   | 11                          |
| Cosmetic or toilet preparations   | 57                          |
| <b>Other petroleum products</b>   | 114                         |

## Green Dot trademark - Isolated use of the Green Dot trademark

Our company provides the legal usage of Green Dot trademark for producers, importers and retailers as well.

- 1. Contract based on packaging emission report once a year** - In this case the Licensee shall send the Licensor a packaging emission report once a year and **pay 1.5 EUR/ton by the amount of the packaging emission.**
- 2. Contract according to categories** presented in the following

| Annual amount of the packaging emission (ton) | Annual fee | Packaging category |
|---|------------|--------------------|
| above 10,000 ton                              | EUR 9 000  | A                  |
| between 5,000 ton – 10,000 ton                | EUR 6 000  | B                  |
| between 3,000 ton – 4,999 ton                 | EUR 3 000  | C                  |

## Services of ÖKO-Pannon

### Consultancy service

ÖKO-Pannon carries out its consultancy services in connection with the following legislation:

- Government Decree No. 80/2023 (III. 14.) on the detailed rules of the operation of the extended producer responsibility system (hereinafter referred to as the “EPR Decree”);
- Government Decree No. 301/2021 (VI. 1.) on the restriction of the placing on the market of certain single-use and certain other plastic products (hereinafter referred to as the “SUP-I”) and Government Decree No. 349/2021 (VI. 22.) on reducing the impact of certain plastic products on the environment (hereinafter referred to as the “SUP-II”);
- Government Decree No. 450/2023 (X. 4.) on the establishment and application of the redemption fee and the detailed rules for the distribution of the redemption fee product (hereinafter referred to as the “DRS”);
- act LXXXV of 2011 on Environmental Product Fee (hereinafter referred to as the “Product Charge Act”);

Interpretation and use of laws in force with consideration to the company’s range of products:

- Performing tasks related to EPR registration;
- Performing tasks related to EPR data reporting to National Environmental Information System (abbreviated: OKIR);
- Preparation of declaration, self-checking of the previous year or correction of the submitted declaration for products subject to product fee and EPR fee and submission to ÁNYK / OKIR system;
- Performing tasks related to the notification and data provision of certain single-use products;
- Performing reporting and data reporting tasks related to DRS;
- consultancy
- Ktdt. notification obligation;
- Ktdt. declaration (hereinafter referred to as the “**declaration**”) obligation;
- Ktdt. refund process;

## Ireland – Repak

### How are fees calculated?

Participation fees are charged at a flat fee per tonne in euro in these categories irrespective of material type: These include licence fees for use of the Green Dot.

| Fee type              | Activity in Supply Chain | Cost EUR/tonne (2026) |
|-----------------------|--------------------------|-----------------------|
| Participation fee     | Manufacturer             | 1.00                  |
| Participation fee     | Convertor                | 1.00                  |
| Material-specific fee | Brandholder/Importer     | (see below)           |
| Participation fee     | Retailer                 | 2.00                  |

Material specific fees are charged at the brandholder/ importer stage of the supply chain and are based on the weight of each participating material placed on the market by members. All fees are calculated on the basis of statistics supplied for previous year placements.

| MATERIAL                       | Cost EUR/tonne (2026) |
|--------------------------------|-----------------------|
| Recycled Paper/Cardboard       | 41.60                 |
| Recycled Glass                 | 19.14                 |
| Recycled Aluminium             | 5.14                  |
| Recycled Steel                 | 64.76                 |
| Recycled Rigid Plastic         | 165.70                |
| Recycled Flexible Plastic      | 165.70                |
| Non Recycled Plastic           | 616.22                |
| PET Beverage Bottles           | 165.70                |
| Other Plastic Beverage Bottles | 165.70                |
| Plastic Non Beverage Bottles   | 165.70                |
| Recycled Wood                  | 14.18                 |

|                        |        |
|------------------------|--------|
| Recycled Composite     | 165.70 |
| Non Recycled Composite | 616.22 |
| Non Recycled Other     | 324.06 |

## Israel - Tamir

| Material               | NIS per Ton - Household | NIS per Ton - Commercial |
|------------------------|-------------------------|--------------------------|
| Glass                  | 502                     | 64                       |
| Cardboard & Paper      | 237                     | 185                      |

## Serbia - Sekopa

### Sekopak's fees for packaging waste management in 2026

| Material        | RSD/Kg* |
|-----------------|---------|
| Paper/cardboard | 6.20    |
| Plastic         | 9.75    |
| Glass           | 13.10   |
| Metal           | 5.71    |
| Wood            | 5.80    |
| Other           | 0.000   |

\*The above fees do not include VAT

On the fees, described in the table above

For Sekopak members fee for using the trademark "The Green Dot" is already calculated in the Sekopak's fees for packaging waste management in 2026.

Obligated companies who are not members of Sekopak and use the trademark "The Green Dot" on their packaging placed on the Serbian market, have to sign the isolated licence agreement with Sekopak for the use of "The Green Dot" based on The Green Dot license fees.

### The Green Dot license fees

| Overall packaging waste quantity placed by the User on the Republic of Serbian market (tons)* | Yearly overall fee (EUR) |
|---|--------------------------|
| 0-99  | 150,00                   |
| 100-499   | 540,00                   |
| 500-999   | 890,00                   |
| 1000-1999   | 1.500,00                 |
| 2000-2999   | 2.050,00                 |

|           |          |
|-----------|----------|
| 3000-3999 | 4.150,00 |
| 4000-5999 | 7.050,00 |
| >6,000    | 9.500,00 |

\* Overall packaging waste quantity based on the last yearly Report on packaging and packaging waste that the User reported to the authorized Agency of the Republic.

Contact details: e-mail: [info@zalais.lv](mailto:info@zalais.lv)

## Netherlands – Verpact

The Packaging Waste Management Fee has various rates, depending on the type of material. For instance, you pay a lower rate for cardboard than for plastic. The rate per category of material is determined by the costs involved in collecting, separating and recycling that specific material. In short, readily recyclable packaging is not only good for the environment but also for your wallet. Part of the rate comprises the general system costs, these being the costs incurred for monitoring recycling and prevention of litter, amongst other things. These costs are evenly distributed over the categories of material. By clicking on the link you will find information as well as detailed cost overviews for the year 2024
